

# Wolman – Leading the Way in Wood Protection

Our company is one of the leading manufacturers of wood preservatives worldwide and offers a comprehensive range of services for a wide variety of wood preservation applications.

Our products offer protection against wood-destroying fungi and insects, extend the life of the wood and thus increase its sustainable use. Founded in 1911, we can look back on over a century of experience in wood protection. Wolman develops, produces and sells wood preservatives that meet the highest requirements.

We offer a wide variety of products for timber and pressure impregnation. We also have solutions to protect against blue stain and for the preventive protection of wood-based materials.

## Systematic Wood Protection by Wolman

### Vacuum pressure impregnation

#### Wolmanit® CX

Liquid wood protection concentrate, suitable for wood in gardening and landscaping, for playground equipment, posts, palisades, fences and decking

#### Wolsit® KD

For preventive protection of timber (without ground contact) against fungi and insects

### Protection of wood-based materials

#### Xyligen® 30F / Wolsit® F-15T

Preventive protection against wood-destroying fungi for indoor use (Wolsit® F-15T) and approved for use in covered outdoor areas / scaffolding (Xyligen® 30F)

#### Wolsit® T

Preventive protection of engineered wood against wood-destroying insects, including termites, for indoor use

### Anti-Sapstain

#### Wolsin®/Sinesto®

Temporary protection against mould and other wood-discoloring fungi; especially suitable for freshly cut timber, during drying, storage or transport

### Treatment of construction timber

#### Wolsit® EC

Protection against fungi and insects with additional protection against mould and discoloring during the drying phase; for indoor and outdoor use (without ground contact)

# Wolman Products for Vacuum Pressure Impregnation

Modern wood preservation places high demands on research and technology. Today, preservatives must be effective and at the same time comply with the legal requirements for environmental, health and occupational safety. Wolman products offer you this security.

The innovative Wolman preservatives of the Wolmanit® CX and Wolsit® KD product families are the basis for durable wood protection and offer the right solution for every application.

Water-repellent additives and colours turn standard wood products into premium products of the highest quality.

## Comprehensive Wood Protection

### Wolmanit® CX

Wolmanit® CX is a product range consisting of liquid preservatives, based on organic and inorganic preserving agents, which are used preventively to combat wood-destroying fungi, including those causing soft rot, and insects, including termites. Extensive international testing has confirmed the effectiveness of Wolmanit® CX for wood applications above- or in-ground, especially in areas with

increased requirements in terms of safety, resilience and durability. With quality impregnation with Wolmanit® CX, the protective agents penetrate evenly and deeply into the wood. This not only achieves long-term protection, but also an efficient and sustainable solution, especially for domestic wood species – and that with safe and easy handling at the same time.

### Wolsit® KD

Wolsit® KD products are water-borne concentrates based on organic preserving agents to be used preventively against wood-destroying fungi and insects.

Wolsit® KD is used to protect wood with no ground contact. Typical applications are facades, balcony cladding, pergolas or construction timber, but Wolsit® KD also offers optimal

protection for external doors and windows.

Wolsit® KD is used in the vacuum pressure and double vacuum treatment processes. It does not color the wood. Coloring in various tones is possible using the Wolmanit® ProColor range.

### Wolmanit® ProColor

We offer a wide range of colors for exterior use for the attractive coloring of wood using vacuum pressure treatment as well as for the dipping process in combination with our

wood preservative solutions (e.g. Wolmanit® CX, Wolsit® KD or Wolsit® EC products). Ask about our Wolmanit® ProColor color-systems.

### Wolmanit® C&T (2018)

Wolmanit® C&T (2018) is a ready-to-use wood preservative for the preventive protection of interfaces of Wolmanit® CX-impregnated wood. Through thorough pressure impregnation of exterior woods with Wolmanit® CX concentrates, reliable protection against wood-destroying fungi and insects is achieved.

During subsequent processing, the timber is often cut, drilled or notched, thus exposing unprotected wood areas. To maintain the protection of the wood, the newly created cut areas must be post-treated with Wolmanit® C&T (2018).

## Our Know-How for Your Success

### Advantages at a glance

#### Wolmanit® CX

- Unique, highly efficient combination of active ingredients
- Long-term protection against wood-destroying fungi and insects
- Uniform, deep penetration of the protective agent
- Extensively toxicologically tested
- Safe and easy processing
- Fixes quickly and is weather-resistant

#### Wolmanit® ProColor

- Extensive color spectrum
- Color intensity can be changed as required
- Also suitable for the re-coloring of already impregnated timber
- Safe for users, processors and consumers
- Fixes quickly and is weather-resistant

#### Wolsit® KD

- Metal-free wood preservative
- Easily soluble and very easily miscible with water
- The colorless product does not stain the wood
- The solution can be colored in different shades

#### Wolmanit® C&T (2018)

- Preventive protection on newly formed cut surfaces
- Immediately ready for use
- Unique, highly efficient combination of active ingredients
- Long-term protection against wood-destroying fungi and insects
- Safe and easy application
- Fast fixing and weather-resistant
